Everbearing Strawberries

Progressive Bear the First Summer

Progressive gives a good crop the first year. We have picked berries throughout summer and until hard freezing weather. The flavor, color and shape remind one of Dunlap and Warfield; of good medium size, and perfect flowered. Especially valuable for the home garden, particularly if planted where they can be watered in case of dry weather.

The U. S. Department of Agriculture says: "The plants are the most vigorous of all the everbearers now in the trade, and are, so far as observed, the hardest variety of strawberry now grown in this country, enduring the extreme climate of the upper Mississippi valley remarkably well. The foliage is very resistant to leaf spot diseases. Both the plant and fruit closely resemble the Dunlap. . . . It is adapted to sections where the Dunlap succeeds and should be planted on fertile soils."

60c per 25, \$2.00 per 100, postpaid.

Progressive Everbearing Strawberry reduced to 45¢ per 25, \$1.50 per 100.
Bubach, Dunlap, Early Ozark and Texas sold out.
